Dangerous corner

North of the railway - concern would set precedent for more development in this area

It is north of the railway line. It's vehicle access is onto the bends on the Maidstone Road, with no pedestrian access to the village, loss of green field site, with the loss of habitat.

Marden full to capacity - not more development should be allowed

Too many units in centre of village

traffic problem in this part of the village

Due to the narrowness of Howland Road and the very dangerous poor visibility from Copper Lane onto Howland Road, also extra traffic would have to negotiate Battle Lane, Marden Road, the railway bridge junction. Also greenfield site and would lead to loss of wildlife.
